JUGNOO

High efficiency LED lighting solutions

JUGNOO 230-50N/120N- with 15 to 120 LEDs

'JUGNOO 230' range of LED lamps are high efficiency light sources, fitted with built-in miniature electronic driver to operate at 220-240V mains supply.

'JUGNOO 230-50N/120N'

Light Tubes & Tiles are power savers in the real sense. The range of Light Tube with 2W - 6W power rating give very high light output. The tube is an ideal light for office and institutional application, cove / concealed lighting in hotels etc.

Model 170N3s High Power LED Lamp

with 3 high quality 1W LEDs, is specially designed for general lighting application, where high overall illumination at very low power consumption is required. It is a maintenance-free FOR-EVER-LIGHT. It fits into 2 pin type normal bulb holder for hassle-free installation

With LEDs operating life of more than 50,000 hours, you do not have to replace it ever. It saves labour for replacement, reduces heat loads significantly, saving air-conditioning costs, and pays for itself in shortest possible time - Excellent for 24x7 application

Adopting LED lighting systems in your home & office will help reduce Global warming and help halt climate change.
